

# 3D Hand

You will need Pilot FriXion Light Highlighters, Clicker pen and cardstock paper.

Print the hand template then place a blank sheet on top and trace lightly with a pencil. You can also skip the printing process and just trace your hand directly on paper or cardstock. Draw straight lines across the page using a Pilot FriXion Clicker pen and curve lines inside the hand. Use Pilot FriXion Light Highlighter to trace over the lines. Fill in the gap with more colour.
